

Kasen Corn

My image is named "His Beauty". I named my image this because it shows many different times when I have taken pictures of things that reminded me of the Lord. I have pictures of bible studies I have done as well as pictures of sunsets. All of these things remind me of God's beauty and how amazing he really is. I have also included a picture of a bird because many animals and the way they act remind me of the beauty of everything God has created and done for me.

In my art piece I used both shape and color. I tried to use different shapes and colors that look well together. I think it turned out pretty well. I also used contrast in different colors in order to make certain things like the background stand out more because I really like the way it looks. I used repetition by putting two of each of the bird and cross picture to make the sides even. This could also be considered proportion.

His Beauty
