

Reece Hunter  
"Around the world"

In my piece, I used seven different images from vacations that I have been on. I chose these images because I enjoy traveling and exploring different places. The message that my collage is representing is, every everywhere in the world has something beautiful to see, also each place has something special to see and feel.

I used the element of color. Color is shown in each image with the different hues of the sky, the water, and the floor. I also have the element of texture. For texture, there is sand, rocks, and architecture. For the principles of design, rhythm is shown throughout all the images. Rhythm is seen in the sky, as well as sunsets and the blue color of the sky. Each image has a sense of unity. The image has multiple different types of designs and with that, they all come into play with making a unique look.
